

# Moroccan Primate Conservation foundation

We work on the protection of the endangered Barbary macaques in Morocco – there are only 4000 left in the wild in Morocco. Barbary macaques are threatened by the illegal pet trade to Europe and the destruction of its habitat.

## Nabila Marhaben, actress and ambassador of the Moroccan Primate Conservation foundation:

“Now I have seen the unique Barbary macaques in the wild, and I have been very close to them in the beautiful nature of Morocco (Cascades d’Ouzoud), I support the work of the Moroccan Primate Conservation foundation even more. This endangered species should stay in the wild. Let us all together prevent this monkey species from disappearing. There are only 4000 Barbary macaques left in the wild in Morocco; that is not much! Dear people, I want to ask you to please never buy a Barbary macaque or any other wild animal during your stay in Morocco. Wild animals do not make good pets. And please do not take a picture with a monkey, even if you think this is fun, because you will stimulate the trade.

I support MPC’s very important work. Will you join me? Thank you!
